Daily Weather Forecast Distribution

Monday 18 May 2026

Issued at 1100 LST

General Situation

The rather strong southwest monsoon prevails over the upper Andaman Sea and Thailand while the low pressure cell covers the coast of upper Vietnam. Isolated heavy rains are forecast in the North, the Northeast and the Central while isolated very heavy rains are possible in the East and the South (west coast). People should beware of heavy to very heavy rains and accumulation that may cause flash floods and overflows, especially along waterways near foothills and lowlands.

The rather strong wind forces the waves in the upper Andaman Sea up to be 2–3 meters high and above 3 meters high in thundershowers. In the lower Andaman Sea and the upper Gulf, the waves are expected to be about 2 meters high and above 2 meters high in thundershowers. All ships should proceed with caution and keep off thundershowers, small boats in the upper Andaman Sea keep ashore.

Weather Forecast for Thailand from Monday Noon to Tuesday Noon

North	Scattered thundershowers and isolated heavy rain in Nan, Phrae, Uttaradit, Tak, Kamphaeng Phet, Phichit, Phitsanulok and Phetchabun. Minimum temperature 23-26 °C. Maximum temperature 35-38 °C. Southwesterly winds 10-20 km./hr.
